2 hours

**INSTRUCTIONS TO CANDIDATES**

- Write your session number in the boxes above.
- Do not open this examination paper until instructed to do so.
- Section A: answer all questions. Refer to the resource booklet which accompanies this question paper.
- Section B: answer two questions.
- Write your answers in the boxes provided.
- A calculator is required for this paper.
- The maximum mark for this examination paper is *[65 marks]*.

**SECTION A**

Answer **all** questions. Write your answers in the boxes provided.

The resource booklet provides information on the Pacific Ocean. Use the resource booklet and your own studies to answer the following.

1. (a) (i) State the source of energy that drives the Earth's ocean currents. [1]

.....

- (ii) List **two** possible sources of plastic garbage in the oceans. [1]

1. ....  
.....  
2. ....  
.....

- (iii) Describe a method to estimate the quantity of garbage in the Great Pacific Garbage Patch (GPGP). [3]

.....  
.....  
.....  
.....  
.....  
.....

(This question continues on the following page)

*(Question 1 continued)*

- (iv) Describe and evaluate **two** pollution management strategies that could be used to reduce the GPGP. [4]

.....

.....

.....

.....

.....

.....

.....

.....

- (b) (i) Explain why albatross chicks may starve if they eat plastic. [1]

.....

.....

- (ii) Explain why organisms at the top of the food web in the GPGP are likely to accumulate high concentrations of POPs (persistent organic pollutants). [2]

.....

.....

.....

.....

*(This question continues on the following page)*

(Question 1 continued)

(iii) State the purpose of the Red List.

[1]

.....  
.....

(iv) List **two** possible threats to albatross species.

[1]

1. ....  
.....  
2. ....  
.....

(c) (i) Using Figure 6, calculate the average frequency of El Niño events between 1990 and 2010.

[1]

.....  
.....

(ii) Suggest **two** reasons why both El Niño and La Niña events may be having a greater impact on human populations today than in the past.

[2]

.....  
.....  
.....  
.....  
.....  
.....

(This question continues on the following page)

*(Question 1 continued)*

- (d) (i) State the **two** material inputs of photosynthesis. [1]

.....

.....

- (ii) Suggest **two** factors that may have contributed to the severe Amazon droughts of 2005 and 2010. [2]

.....

.....

.....

.....

- (iii) Construct a flow diagram showing a positive feedback loop caused by a human activity on the carbon cycle in the Amazon rainforest. [3]

*(This question continues on the following page)*

*(Question 1 continued)*

(e) (i) Outline the trend shown in the data in Figure 9.

[1]

.....  
.....

(ii) Suggest **one** reason why there are variations between the published data of the three organizations in Figure 9.

[1]

.....  
.....

SECTION B

Answer **two** questions. Write your answers in the boxes provided.

Each essay is marked out of [20] of which [2] are for clarity of expression, structure and development of ideas:

[0] Quality of expression, structure and development is poor.

[1] Quality of expression, structure and development is limited.

[2] Quality of expression is clear, structure is good and ideas are well developed.

2. (a) State **three** reasons why global energy use continues to rise. [3]

(b) (i) Explain why some countries are trying to reduce their carbon dioxide emissions levels. [2]

(ii) Suggest **three** ways in which carbon dioxide emissions could be reduced, giving examples. [6]

(c) Compare and contrast the reasons for the choice of energy sources used in **two named** countries. [7]

*Expression of ideas* [2]

3. (a) Distinguish between *anthropocentrism* and *technocentrism*. [4]

(b) Explain how environmental value systems can help to achieve sustainable development. [6]

(c) Compare and contrast the role and activities of a **named** intergovernmental organization and a **named** non-governmental organization in conserving and restoring ecosystems and biodiversity. [8]

*Expression of ideas* [2]

A large rectangular area containing horizontal dotted lines for writing.

A large rectangular area containing a grid of horizontal dotted lines, intended for handwritten notes or answers.

The page contains a large rectangular area with a dotted grid pattern, intended for handwritten notes or answers. The grid consists of approximately 25 horizontal rows and 100 vertical columns of small dots. The grid is enclosed in a thin black border. On the left side of the page, there is a vertical strip with a textured, stippled pattern, and a black circular mark is visible near the top left corner.

A large rectangular area containing a grid of horizontal dotted lines, intended for handwritten notes or answers.

The form consists of a large rectangular area filled with a grid of small dots, spaced evenly both horizontally and vertically. This grid is designed for handwritten entries, likely for a data log or a detailed report. The grid covers most of the page's content area, leaving margins at the top, bottom, and left sides.

A large rectangular area with a dotted grid pattern, intended for handwritten notes or data entry. The grid consists of approximately 25 horizontal rows and 100 vertical columns of small dots. The grid is enclosed in a thin black border.

A large rectangular area with a dotted grid pattern, intended for handwritten notes or data. The grid consists of approximately 25 horizontal rows and 100 vertical columns of small dots. The entire grid is enclosed within a thin black border.
